GitHub: <https://github.com/Induja-Karalliyadda>

Software Engineer and Full Stack Developer with a BSc (Hons) in Software Engineering from Cardiff Metropolitan University. Experienced in designing and developing scalable web applications using Java, Spring Boot, React, Node.js, Express.js, Angular, MySQL, and PostgreSQL. Skilled in RESTful APIs, database design, unit testing, Git, and Agile methodologies. Passionate about building efficient software solutions and continuously learning emerging technologies.

TECHNICAL SKILLS

- Languages: Java, JavaScript, Node.js
 - Frameworks & Libraries: Spring Boot, Angular, React, Express.js
 - Databases: MySQL, PostgreSQL
 - Web Technologies: HTML5, CSS3, Bootstrap, RESTful APIs
 - Testing: JUnit 5, Swagger UI
 - Version Control: Git, GitHub
 - Methodologies: Agile, Scrum
 - Tools: IntelliJ IDEA, Visual Studio Code, Postman, Jira, Figma, draw.io, SceneBuilder
-

Soft Skills

- Communication
 - Teamwork
 - Problem Solving
 - Adaptability
 - Time Management
-

PROFESSIONAL EXPERIENCE

Training Software Engineer

Institute of Computer Engineering Technology (iCET)

February 2024 – May 2024

- Developed server-side applications using Java Spring Boot and MySQL.
 - Implemented RESTful APIs for communication between front-end and back-end systems.
 - Developed responsive user interfaces using Angular and Bootstrap.
 - Utilized Git and GitHub for version control and team collaboration.
 - Performed unit testing using JUnit 5 to ensure code quality and reliability.
 - Participated in Agile software development processes including sprint planning, daily stand-up meetings, and retrospectives.
 - Conducted knowledge transfer sessions on JUnit testing and Liquibase implementation.
-

EDUCATION

Bachelor of Science (Hons) in Software Engineering - Cardiff Metropolitan University

Diploma in Software Engineering - Institute of Computer Engineering Technology (iCET)

GCE Advanced Level - Commerce Stream - St. Sylvester's College, Kandy

GCE Ordinary Level - St. Sylvester's College, Kandy

PROJECTS

FLEETMADOX - BUS FLEET MANAGEMENT SYSTEM

Technologies: React, Node.js, Express.js, PostgreSQL, JWT

- Developed a full-stack fleet management system with role-based access control.
 - Built RESTful APIs for vehicle, driver, fuel, and compliance management.
 - Implemented JWT authentication and authorization.
 - Designed PostgreSQL database schemas.
 - Developed fuel efficiency monitoring and maintenance tracking features.
-

PAHANA EDU BOOKSTORE

Technologies: Java, JSP, Servlets, Maven, MySQL, JUnit

- Developed a Java-based bookstore web application using JSP and Servlets.
 - Implemented secure authentication and dynamic web functionalities.
 - Integrated PDF generation using Apache PDFBox.
 - Implemented email functionality using JavaMail.
 - Built and deployed the application as a Maven WAR project.
 - Performed unit testing using JUnit.
-

LIBRARY MANAGEMENT SYSTEM

Technologies: Spring Boot, Angular, Java, MySQL, Swagger UI

- Developed RESTful APIs for book and borrower management.
 - Implemented authentication and authorization mechanisms.
 - Built a user-friendly Angular front-end.
 - Used Spring Data JPA for database operations.
 - Integrated Swagger UI for API documentation and testing.
-

EXTRA-CURRICULAR ACTIVITIES

Entrepreneur Society - Secretary

Student Parliament - Minister of Education

Saukyadana Society - Member

INTERESTS

- Artificial Intelligence and Modern Technologies
 - Cricket
 - Electronics
 - Swimming
-
